Dominik Friedrich

Grown up surrounded by classical music and folk music of other cultures, it was clear to Dominik Friedrich from an early age that becoming a musician is the only way for him. After studying and performing in many different styles, he found a musical language to play in - his very own world of sound.

Alone with just his guitar named Lalola, he calls his songs into being with a richness of tone you would only expect from a whole band. Extreme virtuosity combined with uniqueness and passion, yet authentic and credible. His songs tell us about the journey. About being at home in the unknown. Music with hiking boots.

Reise Reise #2 (2020)

About Reise Reise #2

Reise Reise #2 is like a diary from a journey. The song „Here I was born“ e.g. is inspired by the adventurous ascension of Myticas, the highest peak of Mount Olympus in Greece. Rainsurprised us and a rescue team had to bring us back down during nighttime. TramuntanasTraum is inspired by a poem of twelve years old croatian boy. He describes how the forrest of the croatian island “Cres” dreams that once again children come to play and dance there in the nature. But nowadays only thieves and destroyers come into the forrest without the sense of the dignity that this place has. Like this song, each of the tunes on Reise Reise has its own story. The most emotional song is Burning Rain, in which I process a climbing accident on Corse. Two years straight I felt permanent pain. As I found faith again in god and in myself and slowly came back to life I wrote this song.
