

wHITE pLASTIC tAPE – Tech Rider 2018

Because we still dream of touring the world, our technical rider is in English, feel free to use google translate when our Austrian English is causing any problems.

The Band wHITE pLASTIC tAPE counts three permanent heads, but also invites guests from time to time to their lineup. (Cello, Trumpet or anything that makes us curios...)

If your location is limited in space or too noise sensitive, we can also play at moderate volumes with a reduced setup. Just let us know in advance. The standard setup includes a drum set, an electric guitar, a stage piano with a synthesizer on top and a pair of vocalists.

The below listed microphones and channels are suggestions and we appreciate any decent microphones you have to offer. We usually bring our own mics for the vocals, just prepare us two stands for them.

We love to hear ourselves on the stage, so depending on the size of it, three monitor wedges with separate mixes would be the optimum.

Musician/Instrument	Channels	Microphone		Notes
Patrick /Main Vocals	1	SM58		
E-Guitar	1	SM57		
Acoustic Guitar	1	DI		
Christo /Piano	2	DI/Stereo		
Synth	2	DI/Stereo		
Backing Vocals or some creepy instruments	1	SM58		
Georgi /Drums Kick	1	Sennheiser 421 or similar		
Snare	1 oder 2	SM57		
Hihat	1	Small diaphragm		
2 toms and a set of cymbals	2	Small diaphragm Overheads		
Cello	1	condenser mic		Not always needed
Trumpet	1	Sennheiser MD 421 or SM57		Not always needed

As we are three very uncomplicated guys, just let us know in advance if we can assist with anything. Thank you for reading our boring tech rider and helping us to perform.
