

## BIOGRAPHIE

Have you ever thought about what really *heavy, psychedelic, trance inducing rock music* should sound like? These guys here did. **Godzilla In The Kitchen** is a three piece *instrumental rock band* from **Leipzig**, Germany. All band members were infected early on by the work of great alternative musicians such as Tool, Mogwai or Kyuss, just to name a few. In **2011** they started their first rehearsals, combining all those different musical influences to create a unique mixture of **memorable melodies** and **rhythmic complexity**. After three years of experimenting live and practicing underground, the three guys released their self-titled **debut album in 2015**. After receiving international recognition through an influential YouTube channel, their album was remastered and reissued in **2021 as a double vinyl**. In spring 2021 they started the recordings of their **second album** which will be released in **June 2022**. They will enter stages in the course of the release tour of their 2nd album.
