TAMA STAR BUBINGA

MADE IN JAPAN

STAR is the new flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance. STAR Bubinga features a much thinner shell than Starclassic Bubinga. In addition, every shell comes equipped with 9mm thick Sound Focus Rings (SFR) for structural support. This shell configuration provides clear projection and resonance to highlight the distinct sound of Bubinga.

TAMA STAR WALNUT

MADE IN JAPAN

STAR is the new flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance. Walnut has long been favored by furniture makers for both its beauty and durability. As a drum shell material, Walnut's naturally EQ'ed tone has been praised by the drum community for both the stage and the studio. STARCLASSIC MAPLE

-Exotic Finishes

In the '80s TAMA's Superstars and Imperialstars reigned supreme - the perfect drums for the times. But TAMA's builders and designers wanted something that transcended trends, something timeless - drums that understood a player's passion and allowed the expression of every genre, style, mood, and technique. They created Starclassic Maple drums...and ignited the thin-shell revolution. And now the new Exotic Finish line offers beautiful, one-of-a-kind exotic wood exteriors for that extra luxurious touch.

S: Shell Kit

STARCLASSIC PERFORMER B/B

-Sparkle Finishes

The distinct and traditional sound of birch has made it the go-to choice for many pro drummers over the last 30 years. TAMA believes it's time to take birch in an entirely new direction. By using bubinga wood as the inner plies of a birch shell, TAMA has created a blended shell that provides a new sound featuring the focused attack of birch, and the enhanced lows of bubinga.

With nearly 40 years of drum building experience, TAMA knows what drummers really want. With this in mind we sought out to design an affordable yet durable kit that retained many high-end features you'll find in our Silverstar, Superstar, and Starclassic lines. What we came up with was Imperialstar. Every aspect of the modern drum kit was exhaustively examined, reexamined, and then improved before it was accepted as part of the Imperialstar design.

RHYTHM MATE

TAMA's entry-level Rhythm Mate drum kit provides the precise bearing edges for easy tuning that beginners need and the wide tuning range that pros demand. TAMA's original Accu-Tune Bass Drum Hoops offer faster, more consistent tuning than traditional metal hoops. And if that wasn't enough, the hardware is equipped with double-braced legs for increased stability. TAMA Rhythm Mate drums are changing the way entry-level kits are designed.

CLAMPS AND ATTACHMENTS

Back in the 1970's TAMA's original introduction of the multi-clamp was a real revolution in the complex instrument we know as the drum kit. Today, multi-clamps are standard equipment in drums of all brands.

CLAMPS AND ATTACHMENTS

UNIVERSAL CLAMP

MC66

One side can hold pipes with diameters from 15.9mm to 28.6mm, while the other side is a ratchet holder that can hold a rod from 9mm to 12mm in diameter at various angles. An excellent clamp for adding an array of new set-up possibilities.

UNIVERSAL CLAMP

MC67

The heavier duty version of the MC66. One side holds pipes with diameters from 15.9mm to 28.6mm, while the other side is a ratchet holder that can hold a 12mm to 25.4mm diameter rod or pipe at various angles.

MULTI-CLAMP

MC61 (US.PAT.NO.6096956)

A basic clamp for connecting stands with pipes from 15.9mm to 28.6mm in diameter with any attachment having a 19.1mm diameter pipe.

MULTI-CLAMP

MC62

A double multi-clamp for connecting two pipes from 15.9mm to 28.6mm in diameter. Both sides feature the FastClamp Easy Set-Up System.

COMPACT CLAMP

MC5 (US.PAT.NO.6093878)

A clamp for connecting parts with diameters of between 9mm to 12mm together. By combining a boom arm (MCB30EN, MCB45EN) and an L-rod (LLT, LCB, LCYE), this clamp can be used to attach a variety of parts onto a simple boom arm.

COMPACT CLAMP

MC7

Same function as the MC5, but with even greater flexibility. The ratchet holder section can hold any diameter tube from 12mm to 25.4mm.

CLOSED HI-HAT

MXA53 (US.PAT.NO.6177621)

Simply designed closed hi-hat attachment that allows for two different settings by turning a lever. Attachable to stands from 15.9mm to 28.6mm in diameter. Great for double bass or double pedal players. And, you can also set up half open hi-hat cymbals by adjusting the spring.

CLOSED HI-HAT

MXA73

PRACTICE PAD

TDP12

The 12" Practice Pad is made especially for marching band players. Aligning both arms within the pattern on the top surface, in the ready position, allows players to check their basic form while playing.

PRACTICE PAD

TMP8S

This snare pad is an actual 4" x 8" inch drum with a mesh head. It has a half cut snare wire facing the backside of the mesh head from inside the drum. The knurled knob on the side of the shell lets you adjust the snare tension from tight to loose and off. You can also adjust the tension of the mesh as on a conventional drum.

PRACTICE PAD

TDP7S

The 7" Practice Pad is the ultimate in portability and provides players with a wealth of sound. The snappy snare sound can be easily turned on and off by turning over the built-in plate.

PRACTICE PAD

TSP6

The special urethane foam on this pad provides a nice bouncy feel for more enjoyable and more productive practice. The six-inch diameter size also makes it easily portable.
