## **SOUND AND LIGHT**

### **SOUND:**

**Soundwise, you guys know best what works on your venue.  
Just turn it up loud enough please :-D**

**Please don't mute anything in between songs, since we have a couple playback transitions.  
We constantly switch positions, so please take care all vocal mics are equally loud.**

### **LIGHTS:**

**We bring a couple lights and operate them ourselves,  
but please feel free to go crazy on your light mixer.  
We love pink, orange, purple and green lights though, just saying.  
Please don't use too much fog.**
