

Review 360 Magazine USA:

"360 Mag Premortal Breath is a potential powerhouse. "Into the Light" literally screams heavy metal. Although the track is a rough cut, you can totally hear quality instrumentation and vocals. "F*uck My Brain" has insane guitar and hardcore drums on deck. Vocals and lyrical content are on par as well. Very powerful message. And, you will most definitely be distracted by "Distracted." Intricate instrumentation, soulful vocals and fierce production. "Mind Over Matter" has a positive message. No matter what obstacle comes in your path, you can still achieve your goals. The musical arrangement is quite impressive. "Your Ruin" showcases the immense power this ensemble possesses. A twisted message of complete self-awareness. Their creativity, talent and originality has placed them in a spot on our 360 Watch List.
