

ALKOHOLIKA

METALLICA TRIBUTE BAND

Press Release

2020

Not only 4

AlkoholikA is more than just four musicians on stage...

More than 4

The band brings not only 4 good musicians on stage, but also video performance and a concept show where the audience is taken to dancing, join in and party.

The name "AlkoholikA" has a historical background of Metallica; the band plays the songs from the first 6 albums where Metallica itself was full of "crazy" and did the best show.

Video performance

Our audience is involved with the show on stage supported by a video performance, specially made for every song.

We use projectors and 70" Screens.

A Video-Technician travels with the band and manage the video-performance during the show.

Real Tribute

We take the audience and travel through the history of Metallica

- All our instruments are the same as Metallica used back then in their early years.
- Our performance for each song it is based on the same song Metallica live act.
- Playing the „live-versions“ of the songs, the audience experiments a Deja-vu, remembering the song as they saw it once live.
