

IVAN MAIDEN

Ivan Maiden is a bunch of highly motivated and experienced musicians who have set themselves the task of presenting the unique music of Iron Maiden. Ivan Maiden was founded in 2021 by Alexander Koch (vocals) and Giovanni "Gio" Soulas (bass). Both musicians come from the prog metal band Ivanhoe from southern Germany. The line-up is completed by the two guitarists Dominik Barth and Torsten Hörnig as well as drummer Paul Wittmann. They also bring many years of musical experience from bands such as Circuit Vision, Illusoria and 10EYES.

All five have been big Iron Maiden fans since their young time. They have not only listened to their music, but also lived it. This has resulted in a band that wants to inspire as many people as possible with the music of Iron Maiden with passion and enthusiasm - especially the younger audience. With his outstanding voice, Alex is so authentically close to the original that you would think Bruce Dickinson is on stage. The guitar duo Dominik and Torsten are in no way inferior to guitarists Dave Murray and Adrian Smith with their performances. The two-part passages and solos are a soothing treat for the ears and make the sun rise in every Maiden heart. The unsurpassed steam hammer on the bass is without doubt Maiden's Steve Harris. Giovanni has taken up this very tough challenge and works the sides of his instrument in a very similar way. In addition, Paul sets the necessary accents with his precise drumming and completes the typical sound of the British band. They have all gained years of stage experience through their various band projects. They made their live debut in spring 2023 at various open airs in southern and eastern Germany. They are a unique live experience not to be missed!
